

Are You Ready for online learning? There are several special situations where online learning is particularly effective. Consider online training when you want to:

- Enhance classroom learning.
- Offer employees a choice of learning styles.
- Bring new employees up to speed on software - immediately!
- Spend training dollars on actual training - not on travel.
- Give employees or students access to courses and resources outside of the office or classroom.
- Ensure that everyone receives consistent information and training.

According to **No Child Left Behind: A Desktop Reference** teachers' preparation to use technology for teaching lags behind access to technology. In 2000, only 27 percent of teachers reported that they were fully prepared to integrate technology in their instruction... (Enhancing Education Through Technology (II-D-1&2)) How can teachers learn the skills they need without spending time away from their classroom? Online learning is the answer! Region 20 has partnered with Element K to bring you online courses and course bundles for training staff and students. Below is just a sample of the courses available.

- Access 2000: Advanced
